Girl Planet Positions

In vedic astrology, the determination of planet positions relies on the nirayana longitude, where "Nir-Ayana" denotes no movement. Here, the ayanamsa, the precise degree difference between the moving vernal equinox and the exact sidereal zero Aries point, is subtracted from the sayana longitudes used in western astrology. Amongst the different practices used for the calculation of ayanamsa, the method used here is chitrapaksha.

Dasa Sandhi Check

Vimsottari dasa is the most important and most supreme dasa as per vedic astrology. There are 9 dashas divided over a period of 120 years. Each dasa has a ruling planet and the life of a person is directly influenced by the nature of his/her ruling planet governing a particular dasa. The first Maha dasa is determined by the position of the natal moon in a given nakshatra.

Final six months of one dasa and the first six months of the next dasa is called dasa sandhi period. Overlapping of dasa sandhi in a man's and woman's horoscope post marriage is considered detrimental to marriage relationship. Therefore, it is recommended to ensure atleast 6 months gap (minimum 1 year is ideal) between dasa sandhi periods of man and woman while considering marriage.
